

RELATIVE HEALTH IMPORTANCE

McMinn County, TN

		Your Health Status Compared to Peers	
		UNFAVORABLE	FAVORABLE
Your County's Health Compared to US Rates	UNFAVORABLE	<ul style="list-style-type: none"> Low Birth Wt. (<2500 g) Premature Births (<37 weeks) Births to Women under 18 White non Hispanic Infant Mortality Colon Cancer Coronary Heart Disease Motor Vehicle Injuries Stroke 	<ul style="list-style-type: none"> Neonatal Infant Mortality Lung Cancer
	FAVORABLE	<ul style="list-style-type: none"> Unintentional Injury 	<ul style="list-style-type: none"> Very Low Birth Wt. (<1500 g) Births to Women age 40-54 Births to Unmarried Women Infant Mortality Post-neonatal Infant Mortality Breast Cancer (Female) Homicide Suicide

The Relative Health Importance table creates four categories of relative concern by simply comparing a county to its peers and to the U.S.

A county's indicators in the upper left-hand box (P) are higher than the U.S. and its peers and may warrant more attention. Conversely, indicators in the lower right-hand box (R) of the table compare favorably to both peers and the U.S. The other boxes represent intermediate levels of health where a county's rate is higher than either its peers or the U.S., but not both.

nrf No report, fewer than 20 deaths in race/ethnicity and age group or less than 10% of the deaths.

nda No data available.

Local data are presented for the Nation's top leading causes of death in each age group. Columns, within age categories, do not total 100% because all causes of death are not listed.

The most complete ethnicity data available are reported.
